

# DOUBLE THE LAUGHS, WIMPY KID-STYLE

## MASH

MASH is a classic game that is even better with Wimpy Kid. Make copies of page 10, and invite kids to predict their own Wimpy Kid future! This game is played in pairs. Start by choosing which team-mate will have his or her future predicted (Player 1) and who will write down the answers (Player 2). Player 2 asks Player 1 for two choices from each category and fills them in on the blank lines. When the entire board is full, Player 2 draws lines in the centre of the board. Without looking, Player 1 says “stop” after a few seconds. However many lines are drawn is the number that is used to find the answers. For example, if three lines are drawn, Player 2 will cross out every third answer. When Player 2 gets to the end of the board, they must go back to the beginning until only one answer is left in each category. Player 2 then circles that answer and skips over the section as he or she keeps eliminating answers. At the very end, when there is only one answer in each category, Player 2 must eliminate all but one of the WIMPY letters at the top of the board to figure out what kind of house Player 1 will live in!
